DETAILED ACTION

Specification

1. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

The disclosure is objected to because of the following informalities: The specification discusses the prior art by reference to Nos. 1-9. However, one reading the specification does not immediately know what references constitute Nos. 1-9 until one reaches page 4. It is suggested that either the legend be placed before the discussion of the references or that a notation appears before the discussion that indicates the particular reference list follows the discussion.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 7, 9 and 10 and their dependents are rejected because it is not clear how the step of treating the ground product differs from the step of drying the ground product. Clarification is required.
